Entertainment Handset

The cornerstone of any patient staff communication system, The EVH-90 Entertainment handset has been designed to meet the specific requirements of the patient, hospital and engineering staff. Providing significant improvements over the existing handsets with durability and improved features. The handset combines in one compact unit: a speaker for listening to TV and/or radio sound and a convenient group of controls for a reading light, TV channel and volume selection. The Nurse Call button has Braille identification and two reassurance lights. Also included is: earphone jack, and a microphone for patient nurse communication via portable phones.

Infection Control:

- Impregnated with Broad Spectrum Antimicrobial to improve infection control
- Including the following micro organisms:
 - 13 bacterial
 - 14 Fungal
 - 5 Algae
 - 2 Steplomyctes
 - 3 yeast
- No sharp edges
- Minimal Ingress potential
